

RESELLER LOGO GUIDELINES

RESELLER LOGO GUIDELINES

As a reseller of SwitchboardFREE we would like to allow you the opportunity to use your logo in conjunction with ours on a co-branded site.

We will create a slide using your logo that will go into the header graphics on the front page and again on the page that is loaded when a user logs out of their account.

Above is an example of how we will use a logo on a reseller branded slide.

The available space for the main copy of the reseller logo is 670px in width by 180px in height. However we would ask that you supply the highest possible resolution of your logo so that if necessary we can style your slide in a similar way as above.

All logos need to be supplied with a transparent background so they will need to be supplied as either an editable document (eg Photoshop, Illustrator) or as a PNG image.

In an effort to maintain to look and feel of SwitchboardFREE we will be creating all graphics involving co-branding in house. If you have any further questions then please contact us by calling on 0203 189 1213 .
