

Seller Append Service

Liquid11 have produced a new data tool developed specifically for Estate Agents. The Seller append Service is designed to increase your contact rate with prospective clients and give your agency a competitive edge.

Seller or Vendor Append

If you have a list of properties that are currently for sale in your region, we can match the address against a large database and return you a name and a contact number enabling your sales agents to make contact with the homeowner right away.

Having a full name gives you a much warmer lead and a mobile phone number gives you the best chances of a conversation.

We can mark your original list with records that we can affect so you would be able to see where we have a match before committing to purchasing the data.
